

BOTTOM LINE

It's not the cost to buy, it's the cost to use.

Schaeffer's #190 Penetro 90[®] busts through rust, saves time and material costs

About the dam

The Dodson Diversion Dam on Milk River in Montana is a timber crib, weir-type structure with movable crest gates. The structural height is 26 feet; the crest length is 8,154 feet.

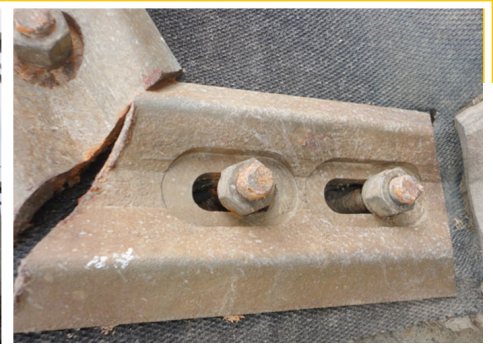

The challenge

A large cottonwood tree drifting down the Milk River damaged the Dodson Diversion Dam when it ripped the dam's rubber membrane. To repair the dam, almost 400 nuts (sized 3/4" x 10 threads per inch) had to be removed; the problem – they were heavily rusted.

"Tearing and destroying the threads was a big concern for us," said Lloyd Burke, owner of Ironhide LLC.

Good people. Great products.

Rust-busting results

By using Schaeffer's #190 Penetro 90[®], Ironhide was able to remove and replace the anchor nuts, saving time on labor and material costs. What's more, the company was able to make the repairs without damaging the threads.

Other Schaeffer products

Ironhide is also pleased with the results they get from these products:

- Supreme 9000[™] Full Synthetic Engine Oil SAE 5W-40
- Supreme #9003D[™] Full Synthetic Engine Oil SAE 5W-30
- #239 Super Gear Lube
- #315 Simplex Supreme
- #204SAT All-Trans Supreme[®]
- #274 Moly E.P. Synthetic Plus Grease
