

BOTTOM LINE

It's not the cost to buy; it's the cost to use.

Randy Schall of Moses Lake, WA

The Story

Randy has used Schaeffer products since 1999. On a 2013 vacation to Arizona, Randy's wife decided she wanted to stop through Las Vegas. They drove from Tonopah, NV, with the temperature of 101°F to Las Vegas with the temperature of 108°F, 200 miles and 3+ hours. When they got to the Vegas strip, it was 131°F on the street with stop and go traffic. Before they got off the bike, due to the bike's temperatures, the street temperature had risen to 143°F. Randy claims he could hear the oil boiling in the crankcase. At 6:30 a.m. the next morning, the motor was still warm to the touch.

Good people. Great products.

Schaeffer's #707 Extreme V-Twin Synthetic Plus Racing Oil 20W-50 Proves it can withstand the heat!

The Results

They traveled a total of 4,000 miles. After getting home, Randy drained the motor oil and put it through a paint strainer to check for metal shavings as he assumed the motor was bad. The oil was clean. Randy ran the Harley another 20,000 miles with Schaeffer oil with no problems.
